

## EFFECTIVE WI-FI AND CELLULAR NETWORK INTEGRATION:

*Alleviating congestion and enabling  
cost-effective service delivery*

Narayan Menon, VP, Research and Development

# About InterDigital

**InterDigital** develops **fundamental** wireless technologies that are at the **core** of **mobile devices**, **networks**, and **services worldwide**.

## 4G

HSPA+  
LTE  
LTE-A  
802.16  
802.21

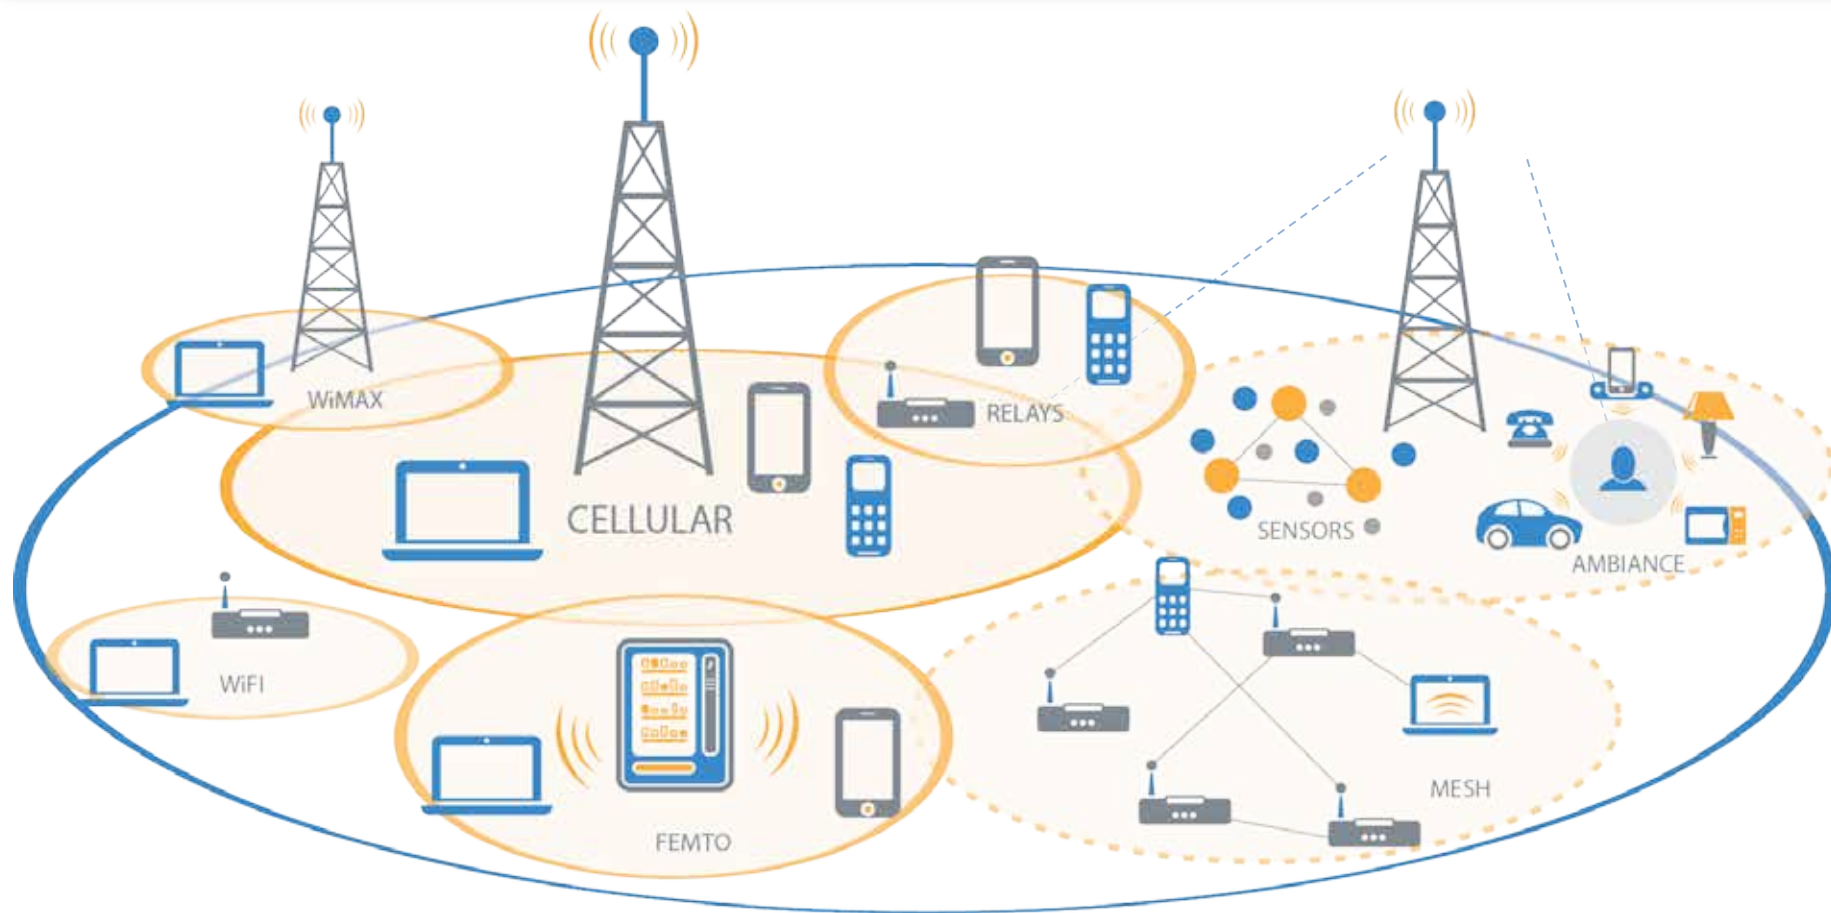

As a **long-standing contributor** to the wireless industry, we solve many of the most **critical** and **complex technical challenges** **years ahead** of market deployment

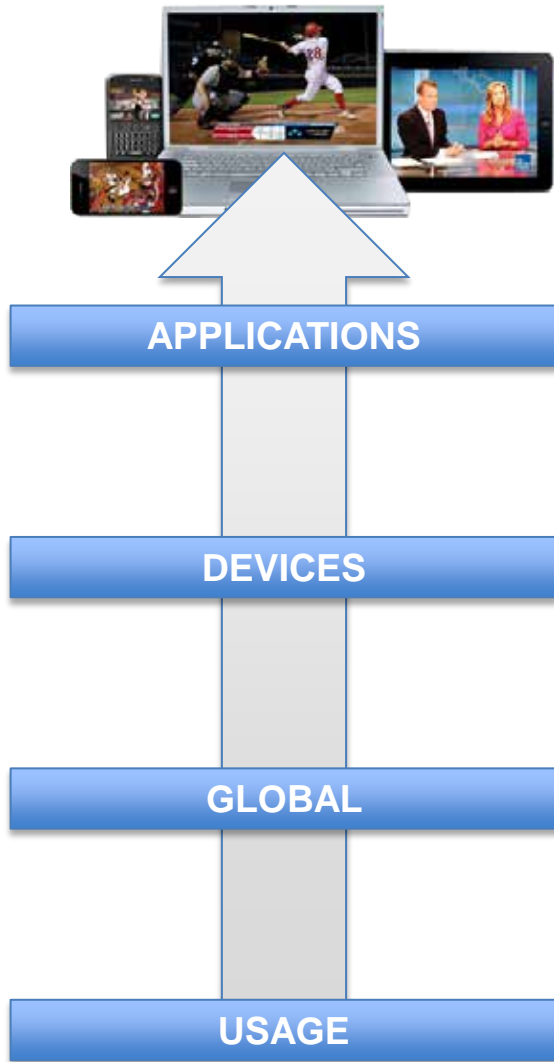

Our advanced solutions support **more efficient wireless networks**, a **richer multimedia experience**, and **new mobile broadband capabilities**.

# Our Guiding Vision: The Network of Networks

Billions of subscribers | Trillions of Connections | Seamlessly Connected and Fully Integrated

# Mobile Ecosystem Fuels Traffic Growth

Mobile video traffic will exceed 50% of the total for the first time in 2011.

In 2010, 3 million tablets and 94 million laptops were connected to the mobile network generating 5x and 22x more traffic than the average smartphone.

Global mobile data traffic grew 2.6-fold in 2010, nearly tripling for 3rd year in a row.

Last year's mobile data traffic was 3x the size of the entire global Internet in 2000.

# Feeding a Growing Bandwidth Gap

Mobile data traffic increases ~35x by 2014<sup>1</sup>

Leading to a 300MHz spectrum deficit by 2014<sup>2</sup>

<sup>1</sup> Average of projections by Cisco, Coda and Yankee Group

<sup>2</sup> FCC, Mobile Broadband: The Benefits of Additional Spectrum, October 2010

# Plenty of Bandwidth If You Integrate Wi-Fi!

Ubiquitous Coverage | Mobility Support | QoS | Services | Roadmap

***Smart Integration of Wi-Fi with Cellular Can Significantly Alleviate the Problem!***

802.11 a/b/g

802.11n

802.11ac

802.11ad

Max Data Rate = 80Mbps

Max Data Rate = 250Mbps

Max Data Rate = 6.9Gbps

Max Data Rate = 6.75Gbps

# Via Smart Allocation of Traffic to Networks...

## USE ALL AVAILABLE SPECTRUM

## LEVERAGE ALL AVAILABLE NETWORKS

## INTELLIGENTLY MATCH APPS TO NETWORKS

UTILIZE WIDE AREA, LOCAL AREA AND IP NETWORKS FOR OPTIMAL PERFORMANCE AND USER EXPERIENCE

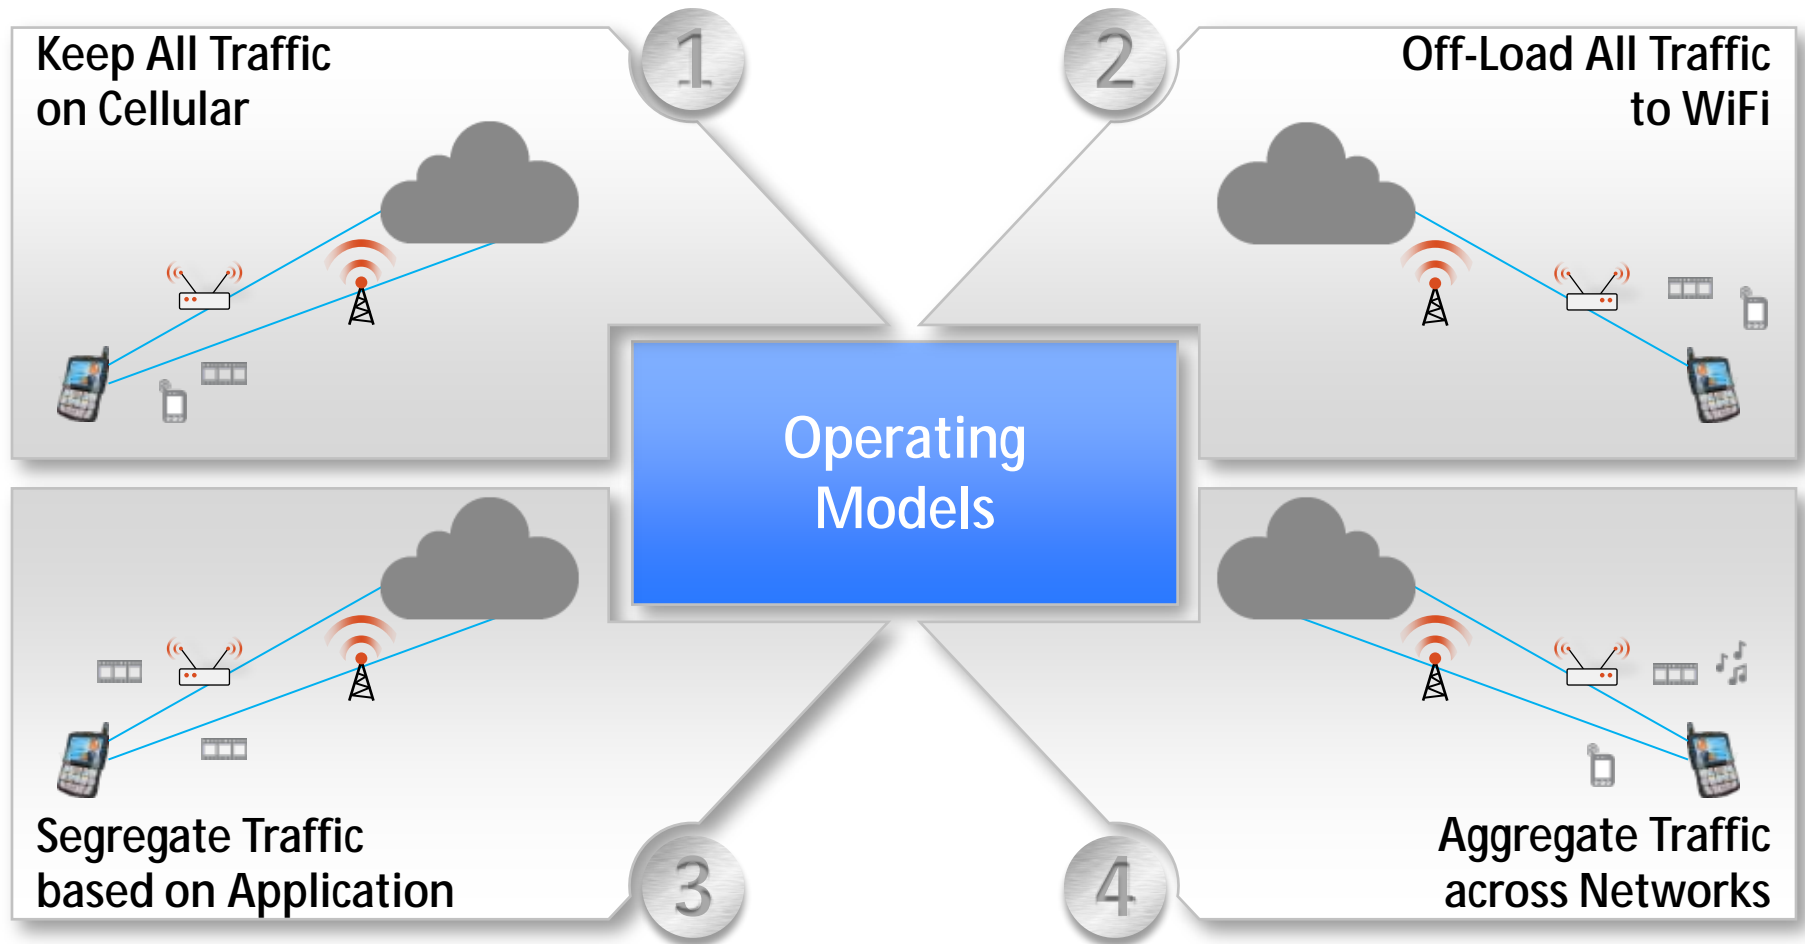

# Not an All-or-Nothing Offload Scheme Like This...

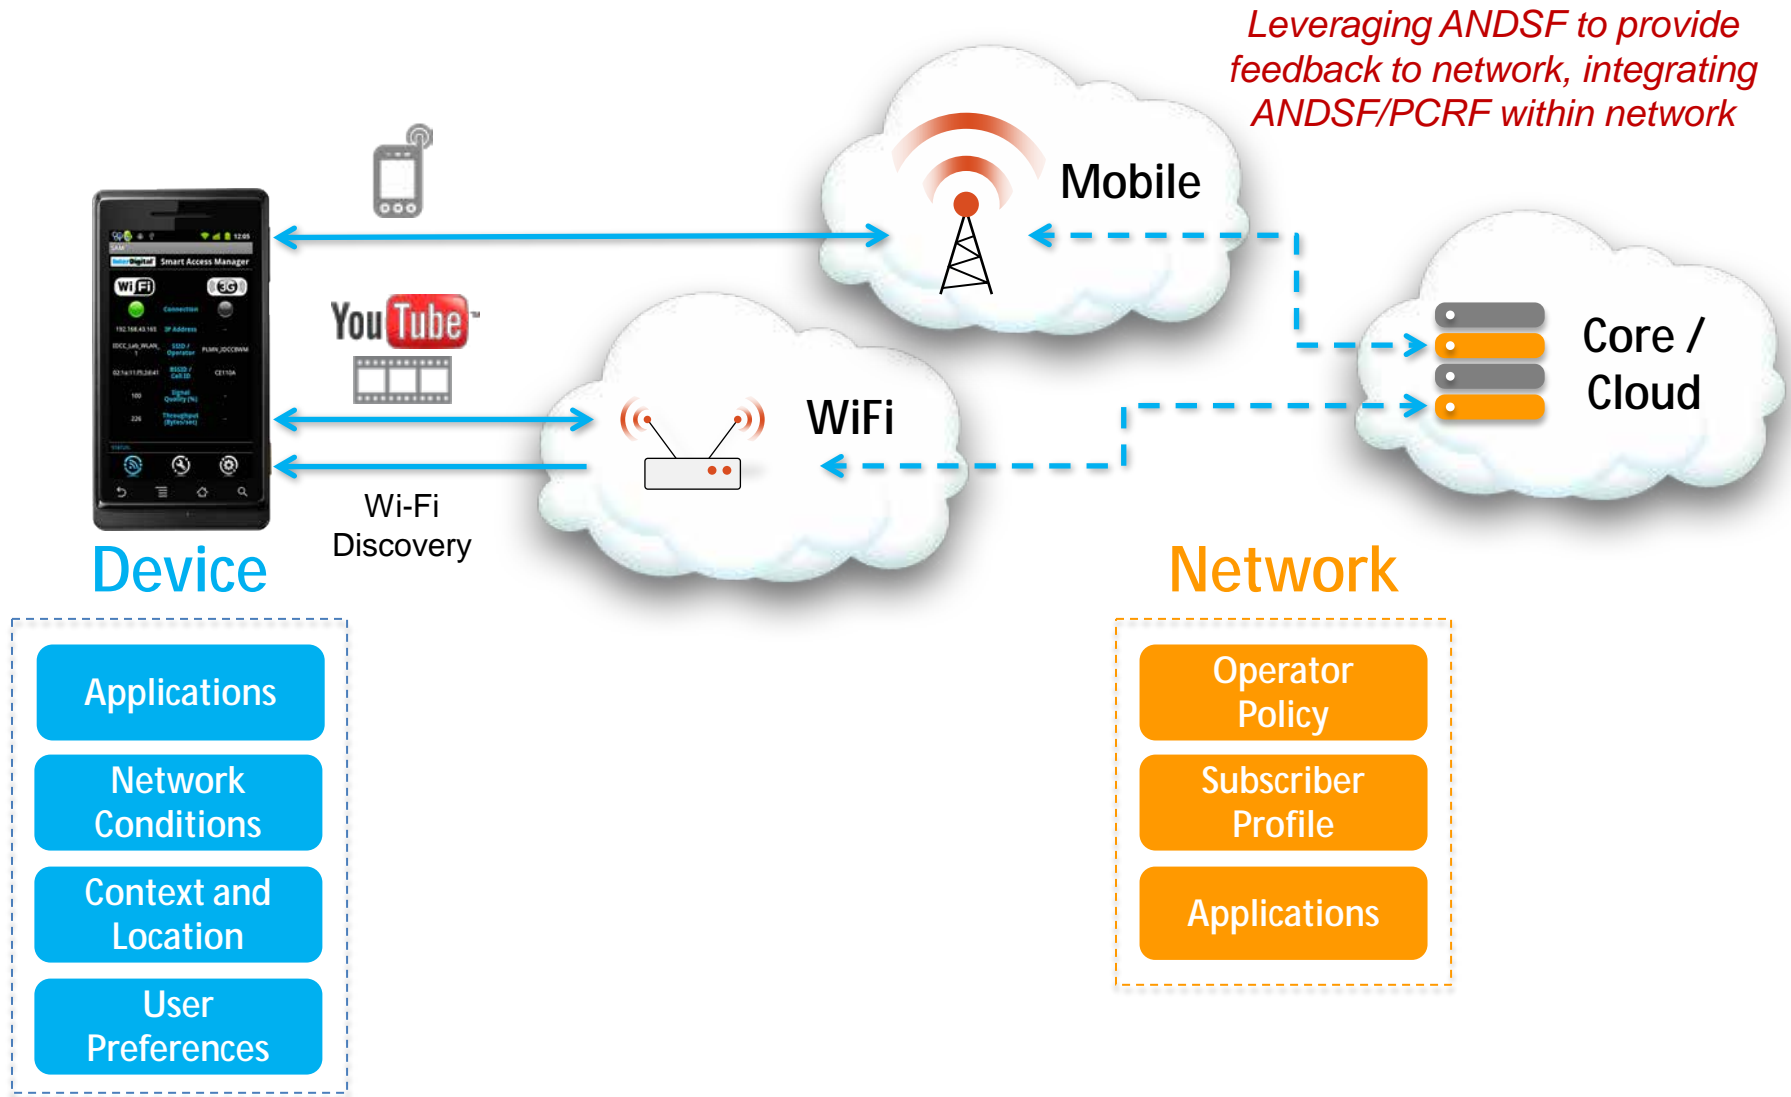

*Requires a more granular solution that offloads selectively and makes optimal use of network resources*

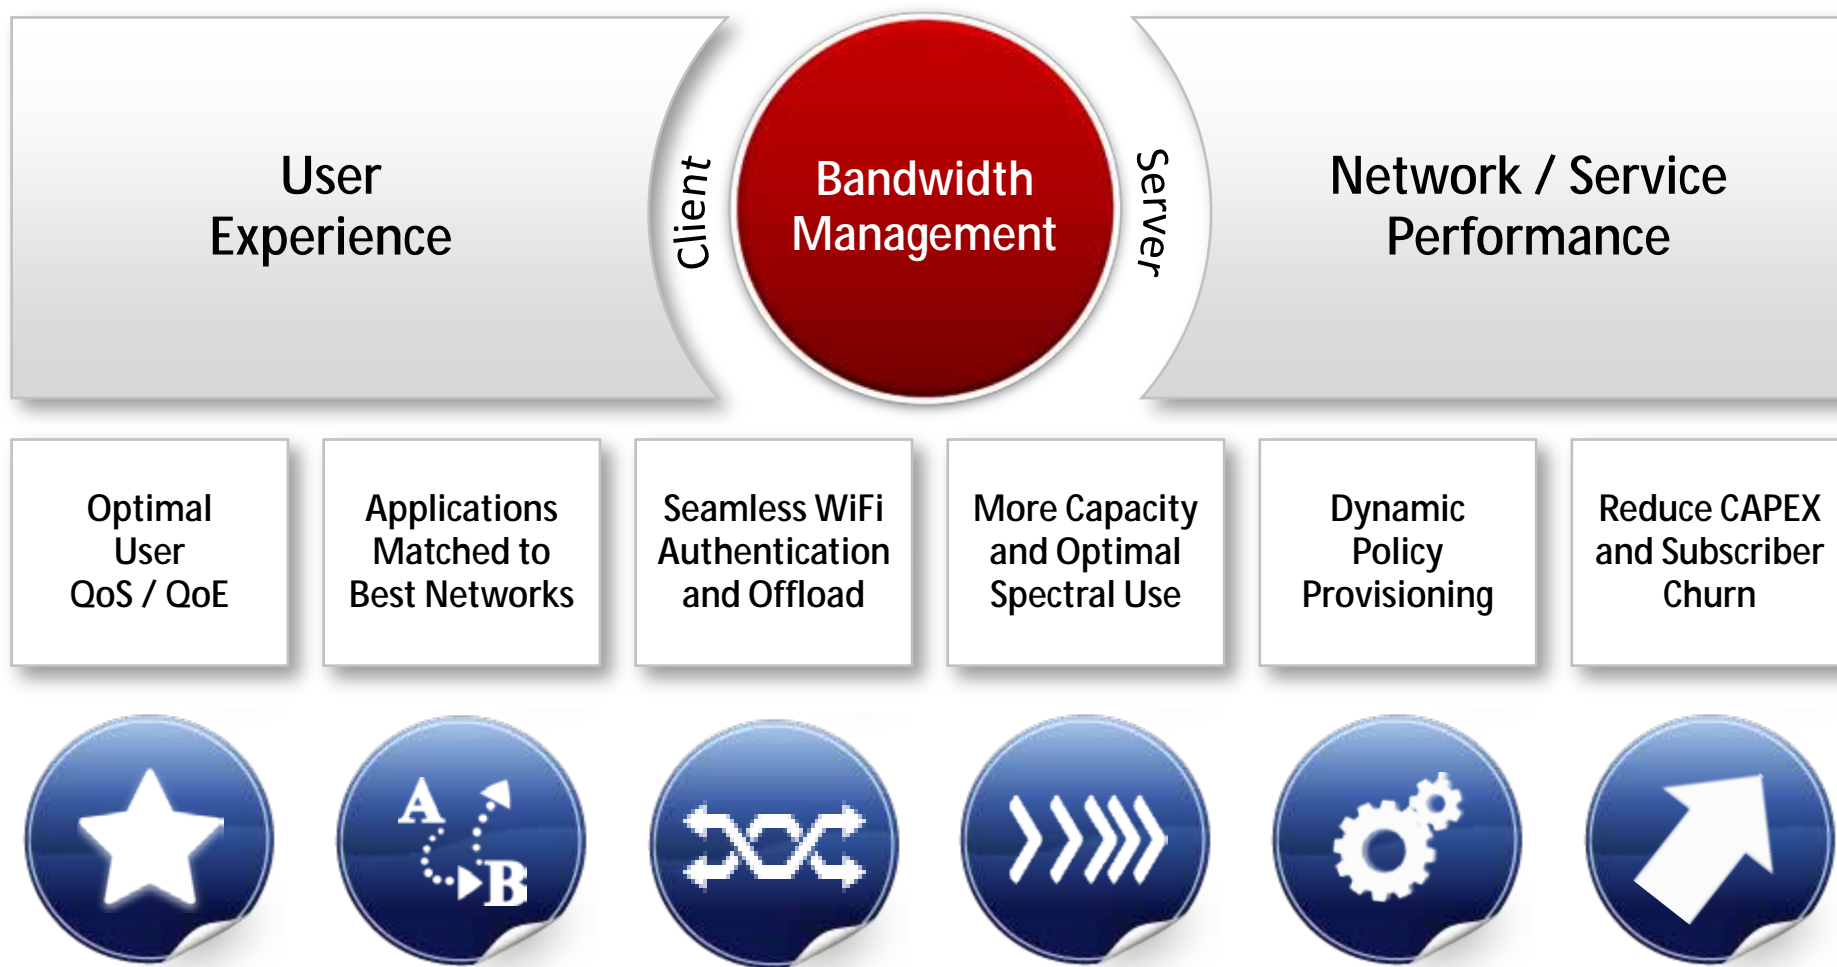

# But Intelligent Bandwidth and Mobility Management

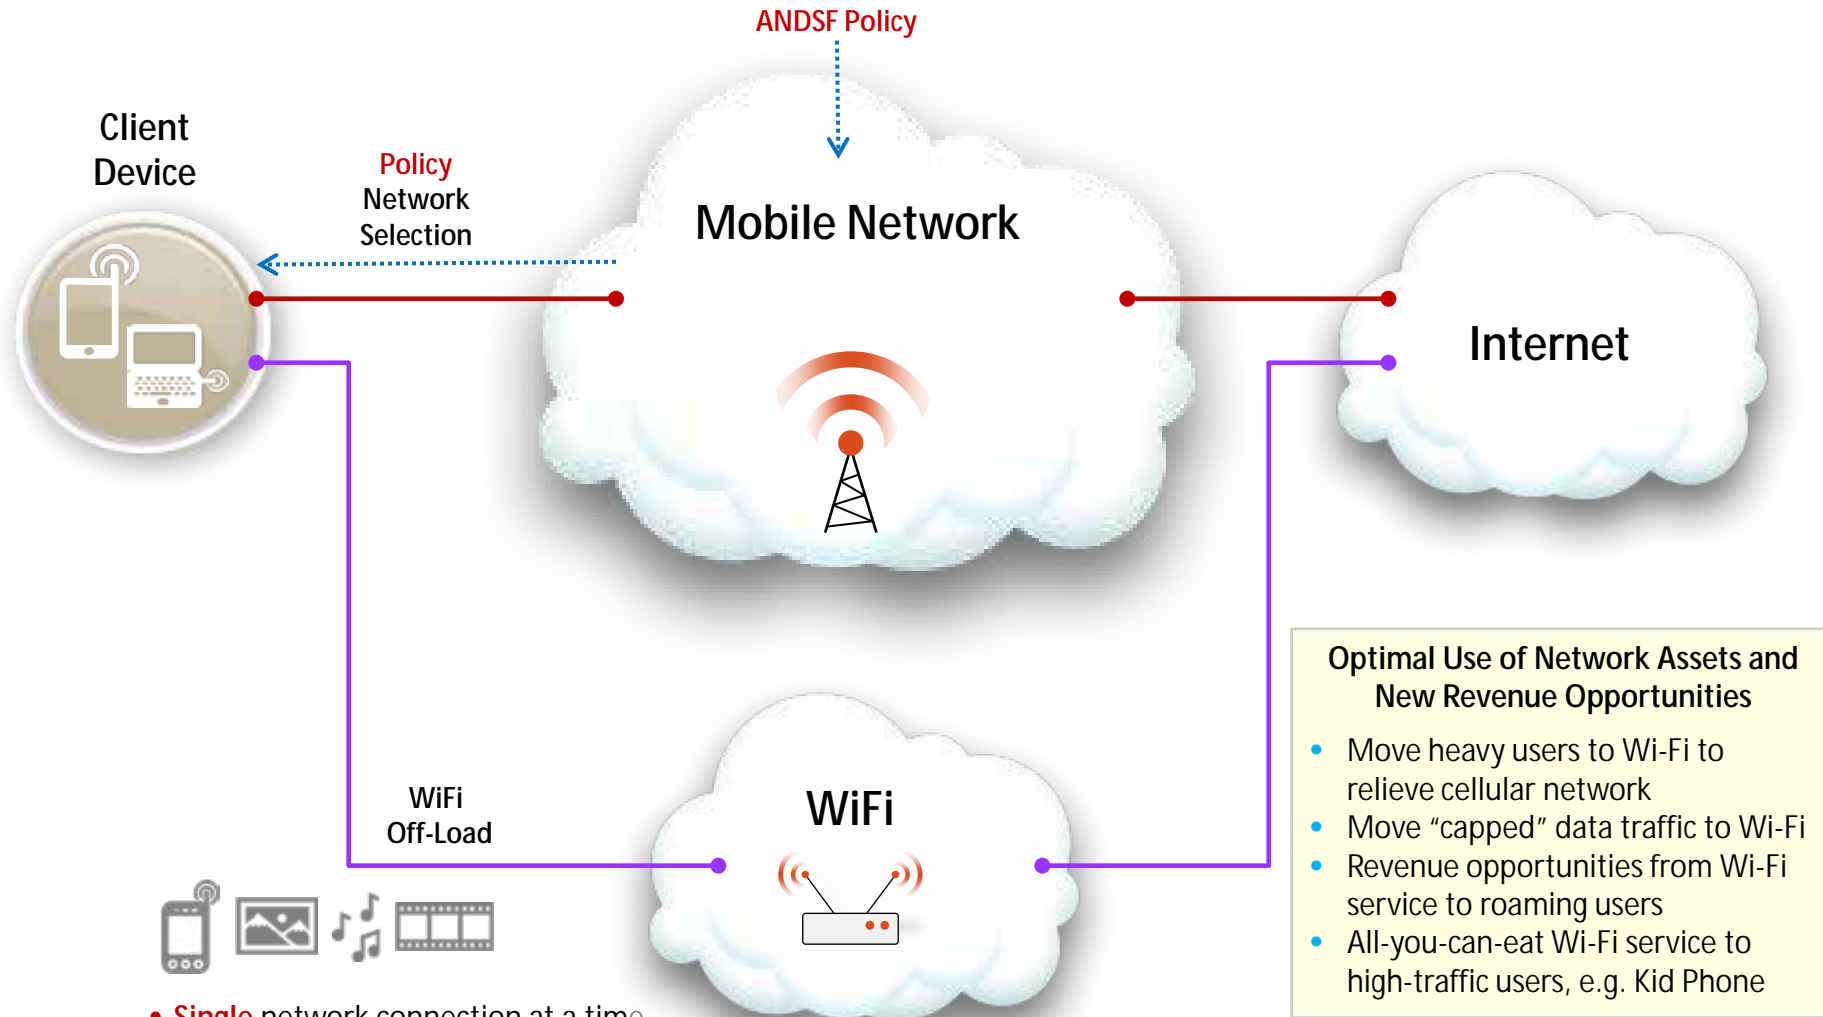

# Guided by Policy – Terminal and/or Network Driven

# Serving the Needs of Key Stakeholders

## Network Selection with Local Policy

- **Single** network connection at a time
- **All Traffic** is off-loaded to WiFi networks based on policy

- ## Optimal Use of Network Assets and New Revenue Opportunities
- Move heavy users to Wi-Fi to relieve cellular network
  - Move “capped” data traffic to Wi-Fi
  - Revenue opportunities from Wi-Fi service to roaming users
  - All-you-can-eat Wi-Fi service to high-traffic users, e.g. Kid Phone

# Even Better: Selective Application-Based Offload

---

## Policy Driven Allocation of Applications to Networks

- § Place the right traffic on the right network

---

## Quality of Service / Experience

- § Meet different user needs or levels of service

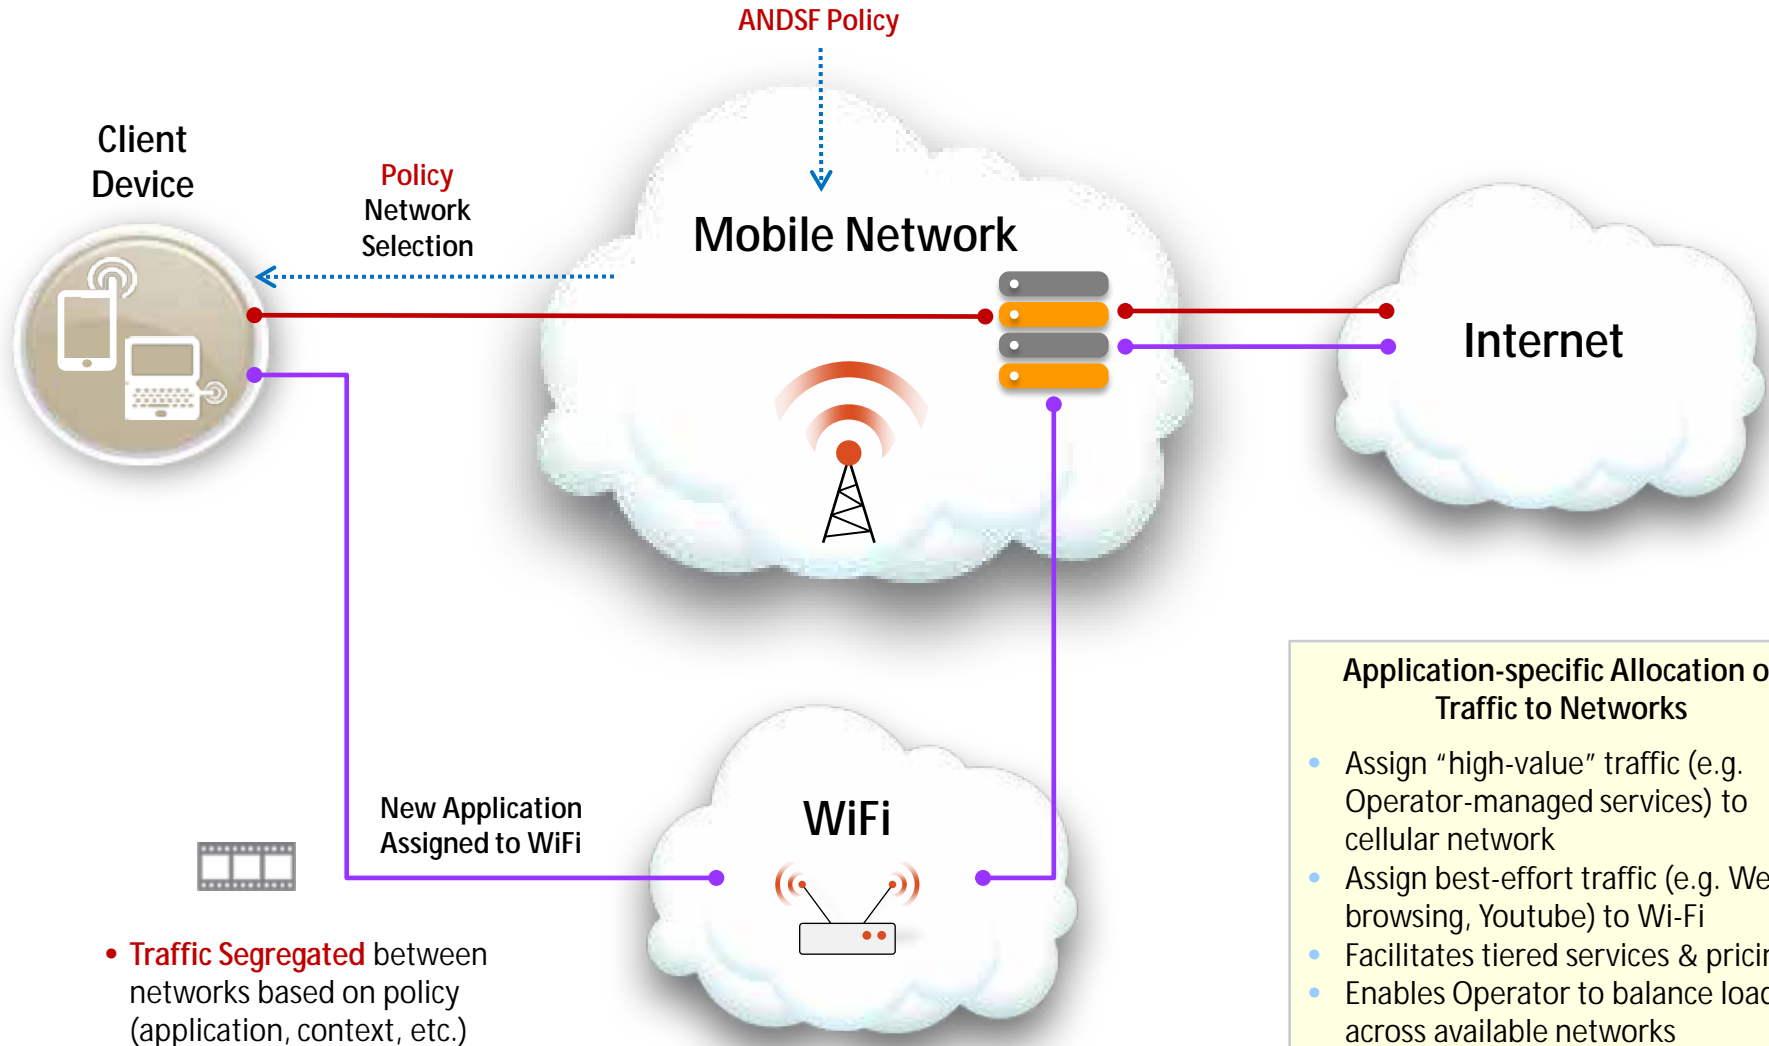

---

## Spectrum & Network Optimization

- § Provide most effective delivery

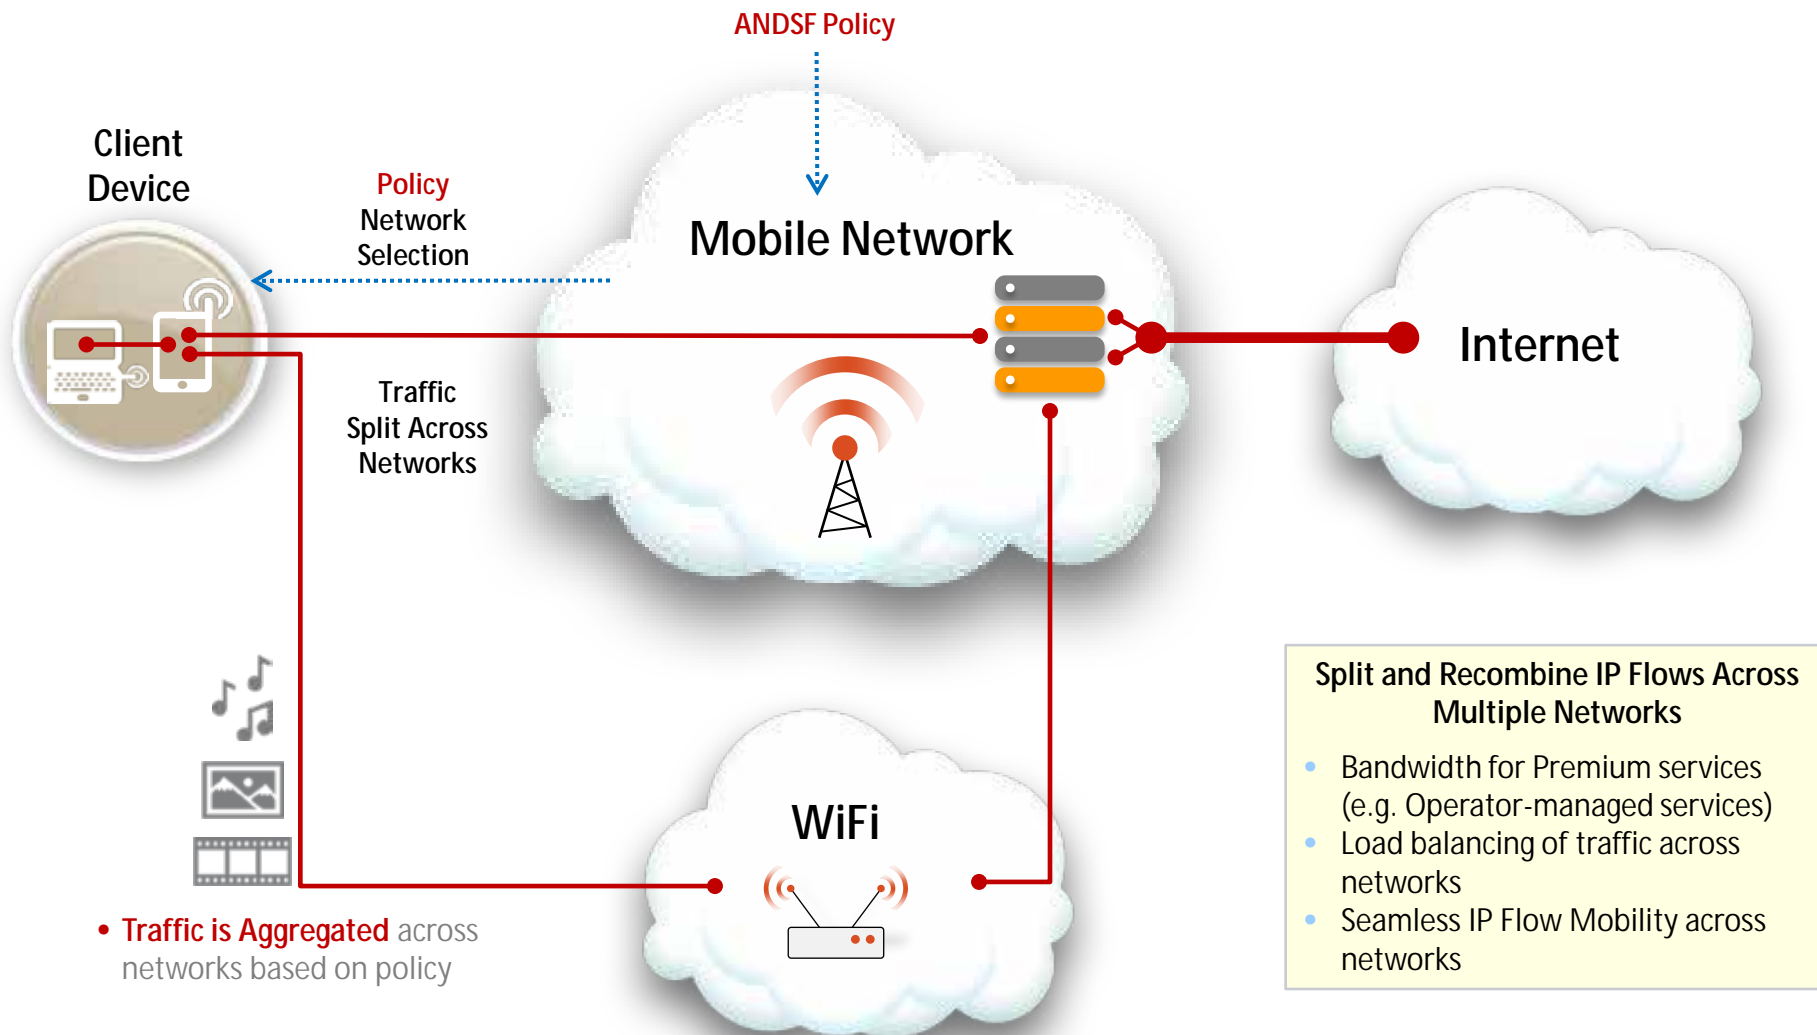

# Traffic Segregation and Mobility

# Aggregation for High-Bandwidth / High-Reliability

# Driven By 3GPP and WBA/WFA Standards Blueprint

## 3GPP (ANDSF Policy, Mobility, Traffic Management)

## Hotspot (WFA, WBA)

*Convergence*

# Smart Access Manager (SAM) Client for Android & Windows based Devices

- Enables “anytime, anywhere connectivity and bandwidth via the best available network
- Policy driven to maximize **throughput** and **QoS/QoE**
- **Operator-controlled** network access
- Supports Network **monitoring** and **reporting** from device
- Application and network awareness based optimization
- **Context-aware** access - location, battery, link quality, cost etc.
- **Real-time event management** - congestion, traffic shaping etc.
- 3GPP, IETF compliant **Connectivity and Mobility**
- Available for **Android & Windows based Smartphones, Tablets and WWAN enabled laptops/notebooks**

Laptops and USBs

Smartphones and Tablets

CE Devices

# Thank You!

*See InterDigital's  
Smart Access Manager (SAM)  
Demonstration  
At Booth #3*

INTERDIGITAL.
